*** Includes IFF**

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price.

These prices are for domestic and overseas delivery.

1c. Description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees who will perform services on behalf of Adnet, Inc. follows:

1. PROGRAM MANAGER

Minimum General Experience: *Basic experience* must include 12 years of IT experience, including at least 8 years of IT and/or telecommunications system management experience. *Specialized Experience* must include: at least 8 years of direct supervision of IT service (e.g., software development, integration, maintenance projects, telecommunications systems, etc.). Must have experience leading projects that involve the successful management of teams composed of data processing and other information management professionals who have been involved in analyzing, designing, integrating, testing, documenting, converting, extending, and implementing automated information and/or telecommunications systems. Must have two years of specific experience in the application of CMM/CMML, ISO, or ITIL best practices. Must have experience leading and managing teams applying process standards to client situations.

Functional Responsibility: Responsible for the coordination and completion of IT projects. Oversees all aspects of projects. Sets deadlines, assigns responsibilities, and monitors and summarizes progress of project. Builds and maintains working relationships with team members, vendors, and other departments involved in the projects. Prepares reports for upper management regarding the status of a project. Employs a variety of industry accepted IT concepts, practices, and procedures including but not limited to those advocated by the Project Management Institute (PMI). Relies on experience and judgment to plan and accomplish goals. Performs a variety of IT-related management and technical tasks. Leads and directs the work of others. Exercises a wide degree of creativity and latitude.

Minimum Education/Training: B.A. or B.S. degree. Master's degree or MBA preferred. Four years of additional experience can be substituted for a B.A. or B.S. degree.

2. Senior Computer Consultant

Minimum General Experience: *Basic Experience* must include 12 years of progressive working experience as a computer specialist or a computer systems analyst. *Specialized Experience must include:* at least eight years of experience as a computer systems analyst. Must have two years of specific experience in the application of CMM/CMMI, ISO, or ITIL best practices. Must have either comparable experience or SEI certification in CMM/CMMI or certification in ISO. Must have experience leading and managing teams applying process standards to client situations. Must have experience working independently to perform process audits, help clients prepare for audits and provide process related training.

Functional Responsibility: Implements computer systems in a phased approach of requirements analysis and conceptual design, site survey, system design review, critical design review, installation, integration, and testing. Performs or supports performing IT requirements analysis for a wide range of users requiring systems that support office automation. Presents system designs for user approval at formal reviews. Performs configuration management, software integration, interpretation of software test results, and recommends solutions for unsatisfactory test results. Provides variety of IT system life-cycle support, including maintenance, administration, and management. Provides solutions to identified software problem reports.

Minimum Education/Training: B.A. or B.S. degree. Master's degree or MBA preferred. Four years of additional experience can be substituted for a B.A. or B.S. degree.

3. Computer Consultant

Minimum General Experience: *Basic Experience* must include eight years of computer experience in at least two of the following disciplines: system analysis, system programming, application programming, and equipment analysis. *Specialized experience must include:* at least three years of experience either as a computer hardware and/or systems software specialist or as

a systems analyst with duties relating to the evaluation of third- and fourth-generation or state-of-the-art computer hardware and software and its ability to support specific requirements for system management or large-scale system development and maintenance. Must have two years of specific experience in the application of CMM/CMMI, ISO, or ITIL best practices. Must have either comparable experience or SEI certification in CMM/CMMI or certification in ISO. Must have experience leading and managing teams applying process standards to client situations. Must have experience working independently to perform process audits, help clients prepare for audits and provide process related training.

Functional Responsibility: Determines or supports determining costs for converting computer systems from one programming language or equipment platform to another by using compilers, simulators, emulators, and/or language translators. Recommends better use of operating systems capabilities for improving system efficiency. Develops, manages, maintains, and evaluates state-of-the-art computer hardware, software, and software development tools. Evaluates their ability to support specific requirements and interface with other equipment and systems. Determines potential and actual bottlenecks in IT systems and proposes recommendations for their elimination. Makes recommendations for system improvements that will result in optimal hardware and software use.

Minimum Education/Training: B.A. or B.S. degree. Four years of additional experience can be substituted for a degree.

4. Junior Computer Consultant

Minimum General Experience: *Basic Experience* must include three years of computer experience in at least two of the following disciplines: system analysis, system programming, application programming, and equipment analysis. *Specialized experience must include:* at least one year of experience in evaluating state-of-the-art computer hardware and software and its ability to support specific requirements. Must have one year of specific experience in the application of CMM/CMMI, ISO, or ITIL best practices. Must have either comparable experience or SEI certification in CMM/CMMI or certification in ISO. Must have experience working on teams applying IT process standards to client situations.

Functional Responsibility: Participates in the evaluation of state-of-the-art computer hardware and software and assessments of its ability to support specific requirements and to interface with other equipment and systems. Determines potential and actual bottlenecks and proposes recommendations for their elimination. Makes recommendations for IT system improvements that will result in optimization of development and/or maintenance efforts.

Minimum Education/Training: B.A. or B.S. degree. Four years of additional experience can be substituted for a degree.

5. Quality Assurance Computer Consultant

Minimum General Experience: *Basic Experience* must include six years of experience in quality assurance and quality control of IT Systems. *Specialized experience must include:* at least three years of experience in verification and validation; software testing and integration; and software metrics, and their application to software quality assessment. Must have one year of specific experience in the application of CMM/CMMI, ISO, or ITIL best practices. Must have experience leading and managing teams applying process standards to client situations. Must have experience working independently to perform a variety of IT-related audits, help clients prepare for audits, and provide quality-related training.

Functional Responsibility: Maintains and establishes a process for evaluating IT services and associated documentation. Determines the resources required for IT quality assurance and quality control. Supports teams in maintaining the level of quality throughout the software development and maintenance life cycle. Develops software quality assurance and quality control plans. Conducts formal and informal reviews at predetermined points throughout the development life cycle.

Minimum Education/Training: B.A. or B.S. degree. Four years of additional experience can be substituted for a degree.

6. Technical Writer/Editor

Minimum General Experience: *Basic Experience* must include six years general experience performing documentation support activities. *Specialized experience must include:* experience in preparing IT-related technical or managerial documentation of relevance to a client's IT requirements, performing research to support documentation development, and preparing original text to support a variety of IT management studies, technology-based systems, or IT-related engineering activities. Must have experience working in a team environment and independently to provide documentation support. Must have strong MS-Office and MS-Project knowledge in developing documents essential. Must have three years specialized experience in performing documentation support activities related to process improvement.

Functional Responsibility: Responsible for developing IT-related project and system documentation including directing the work of junior personnel that meets standards and requirements of the client's environment. Researches and collects pertinent materials. Organizes materials and writes descriptive copy according to established standards. Reviews published

materials and recommends revisions in scope, style, terminology, format, content, and graphic presentation. May select graphic art, sketches, diagrams and other visual work products to illustrate descriptive narrative. Uses automated documentation tools and applications relevant to client's environment and work requirements.

Minimum Education/Training: Bachelor's degree in journalism, English, or a related technical or management discipline. Master's degree preferred. Four years of additional experience can be substituted for a Bachelor's degree.
